

Course Report AG2110 2024

41 students were registered for the course. At the time of writing the course report, when the student evaluations were sent, 40 students had passed the course (24 with VG and 16 with G).

Substantial changes were made to the course this year given feedback from students the following year. Adrian Hyde Price retired in the summer, so all of his hours (56 hours in total) on the course were available for revision. Last year's course evaluations suggested that the introduction to international relations that Adrian's lectures covered and the seminar were too basic and not tailored enough to the specific focus of the course. So, I took over all of Adrian's hours and designed three new lectures and a new seminar that I taught for the first time this fall that are really tailored to the course. The lectures cover global policy making: how this functions and through what actor constellations. The new seminar has students discuss the influence of NGOs in global policy making. Both of these topics are central to understanding global governance.

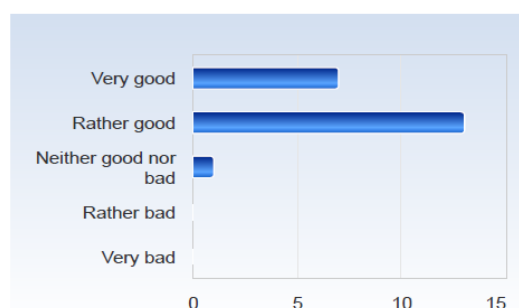

21 students out of 41 responded to the evaluation, approx. 51% of those who took the course. In this case, one could argue that the results are potentially not representative of the universe of students that took the course. The course was evaluated more positively than last year in both the students' ratings and in their freely written comments. All aspects of the course were rated rather good or very good by the majority of students. Thus, overall, the course was rated favorably by the students.

In the student comments, there were two recurrent critical comments on the course. To summarize, these comments suggested that the paper writing work for the seminars could have been spaced more equally and the material covered in the section on game theory and trade theory was somewhat redundant when it came to recorded lectures that the students could watch before the in-class meeting. I will take these comments into consideration in thinking of ways to improve the course for next year.

Below is a summary of how the course was rated based on responses to each of the questions on the course.
