

AG2120 International Administration and Policy

Course report, Fall 2022

The course was in many respects similar to the 2021 version. Like last year, the first part of the course focused on questions of international administration and policy relating to armed conflict and post-conflict societies. Replacing the lecture on transitional justice, a new lecture on sanctions was introduced, together with a new seminar focusing on the Russo-Ukrainian war. Magnus Lundgren handled lectures and seminars during this part of the course. The second part of the course was structured like in the previous year, addressing topics relating to aid, development, corruption, and democratization, with a focus on how international actors and interventions could promote desirable outcomes. The teachers were Agnes Cornell, Marcia Grimes, and Adea Gafuri,

The course offered students a choice of five different seminars, two in the first half and three in the second half. Like before, students were required to write two shorter seminar papers, make one oral presentation, and write one longer research paper. Also like before, there was also a final “student conference,” during which students presented their research papers in a group format. In response to feedback from last year, the supervision sessions for the final paper were scheduled with more space in between sessions.

Overall, the course evaluations suggest that the course has worked well. Of the students who responded to the evaluation survey, 100 percent rate the course as either “very good” or “rather good”. All respondents also rate the lecturers and the teachers in these two categories. 60 percent rate the course, lectures, and teachers as “very good”. Also, 85% of respondents rate the course organization and information as “very good”. 95% rate the seminar assignments as “very good” or “good”. The final research paper assignment is somewhat less favorably rated, but 85% still rate it as “very good” or “rather good”.

The comments suggest a few things that can be improved. First, students are unsatisfied with the research paper extending over the holidays. This is not something that we can do much about, given that we have to operate within the established term system, but options for extending the submission time will be explored. Second, some comments point to the problem of group work, specifically that some students free-ride on others but still receive the same grade. Options to address this will be explored.

A problem that is not apparent from the course evaluations is plagiarism. During the course, one student investigated for possible plagiarism and several students were warned. While this represents an improvement from last year, it remains an issue that calls out for further intervention. The course already discusses this topic and clearly warns the students of the implications of plagiarism, but the next version will make further efforts. It is also recommended that the Department considers other options for addressing the problem of plagiarism more generally and especially in courses with a high proportion of visiting or foreign students.

Below is a summary of how the course was rated based on responses to each of the questions in the course evaluation by the 20 students that completed the evaluation.
